

What makes us so Special?

We are deliberately different because we do not want to be “just another agency” but will use our knowledge & skills to ensure that our clients and care staff get the service they deserve which will ultimately benefit the service users, whom it should be all about.

- AHP Healthcare is both passionate and driven to deliver a service we would want ourselves, should we ever need help in our own home or care home.
- Our sister company (AHP Homecare) is registered with CQC and fully understand their policies & procedures & challenges to maintain a safe service with excellent outcomes.
- Offering a safe, friendly and caring environment, we actively listen to and respond to those we support, promoting a culture of involvement and participation, as well as encouraging independence.
- All our consultants are ex carers and have the understanding & passion to recruit & match the right person.
- AHP Healthcare is committed to equal opportunities, promoting fair and objective treatment of all Clients and Carers, irrespective of race, colour, sexual orientation, disability, gender, or ethnicity.
- We also behave with honesty, integrity and openness, so if there are any concerns, never be afraid to speak out; we are here to resolve any issues.
- Very rigorous recruitment & compliance policies.
- Every carer must do 17 trainings before they can start working for us.
